

Kelly Holthaus

Tulane university

I am requesting an adjustment to the sailing instructions 1.6; (3.3d) where it states "when tacking or gybing, crew shall not hang, push, or pull on the shrouds, mast, cockpit safety lines, stanchions, companionways or any other item to promote the maneuver." Would the OA be willing to amend SI 1.6; (3.3d) to allow a crew member to use the mast to facilitate boat handling maneuvers?

No.
